

Why executives said yes to Wdesk

"With Wdesk, we have reduced consulting fees by \$38,000 and hours by 20% on our most complex and riskiest process while saving on headcount."

—AJ BAGGOTT, Vice President of Financial Reporting and Investor Relations
Diversicare Healthcare Services, Inc.

"After acquiring two private companies, we were able to utilize Wdesk to efficiently share our SOX and internal control documentation without the use of Word®, Excel®, or SharePoint®. We can collaborate on documentation through the Wdesk cloud-based productivity platform across many different office and geographic locations—significantly increasing efficiency and maintaining strong version control."

—TIM DORREN, Director of Accounting, Advance Auto Parts

“With Wdesk, we have seen hourly billing decreases with our internal audit consultant.”

—Corporate Controller, Vice President Accounting
Information Technology Company

“With the time saved from Wdesk, we’ve become a better audit department. The team is able to add value in areas outside of SOX—especially in financial audits, operational audits, and looking at complicated contracts.”

—Vice President Internal Audit, Healthcare Company

“The biggest benefit of Wdesk is confidence from external auditors. If we have great SOX documentation, they have more confidence in us. Wdesk helps us build a relationship with external auditors, which makes our engagements easier.”

—Corporate Controller, Vice President Accounting
Information Technology Company

“The efficiency gained with Wdesk is probably the equivalent of a full-time employee over the course of a year.”

—Internal Controls Manager, Multinational Energy Company
